# 10 Important Questions to Ask When Interviewing Website Designers & Developers

Want to make sure you find the right web designer or website developer for your new project? Interview them with these questions, and pay close attention to their answers.

**1. What is your approach to a website development project?**

**2. Have you done any work similar in functionality or size like ours? Can you show me any examples of projects with similar goals?**

**3. When will you start, how long will the project take and who will be managing our account?**

**4. Do you use a content management system? What are the advantages and disadvantages?**

**5. Do you factor in search engine optimization in your design process?**

**6. What do we need to do?**

**7. Will the website be responsive on mobile devices and tablets?**

**8. When the site is complete, will you provide training? What happens if there are technical problems after going live? What other services do you provide?**

**9. How much will it cost? How do your price your services?**

**10. Tell us about your company. How long have you been in business?**
